

Earthquake

During an earthquake, remain calm and quickly follow the steps outlined below:

1. If indoors, seek refuge in a doorway or under a desk or table. Stay away from glass windows, shelves, and heavy equipment.
2. If outdoors, move quickly away from buildings, utility poles, and other structures. Always avoid power or utility lines as they may be electrified.
3. If in a motor vehicle, stop in the safest place available, preferably away from power lines and trees. Stop as quickly as safety permits but stay in the vehicle for the shelter it offers.
4. After the initial shock, evaluate the situation and if emergency help is necessary, call the building principal. Protect yourself at all times and be prepared for aftershocks.
5. Damaged facilities should be reported to Plant Operations. Note: Gas leaks and power failures create specific hazards.
6. If an emergency exists, activate the building alarm.
